Security exercise Aug/Sept??

Open 90 exercise worst case scenario spill exercise

New Business

LEPC-Rick- 493 Hamilton county facilities tally. All Star game off without a hitch.

USCG-new faces. Will be getting out to meet everyone.

EMA- threat briefing about security

Mike Doll mentioned about a little incident that happened at PCNA. Elmer saw a suspicious truck with a device at their gate 3. He stopped them.. asked for identification. Found it was the EPA doing an air check, but followed Elmer followed protocol.

Barry Whitton- showed camera system for OH River.

Dale Farmer- OH river tactical plan and Mill Creek plan for boom deployment.

Dukes exposure shows that preplanning is needed. The boom deployment was 8 miles down the river for a diesel leak. Two plans, boom deployment locations/plan and company plan needed. Access data base gives basic information of the river way so contractors/ Plant has information required for how much boom etc that they may need. Where, how and who your going to contact. Staging and observations locations are also shown in the data.

Raven911

Asking companies for a one page response sheet- facility tactical oil response plan released to navigable waterways. SOSINK Raven911 [Http://raven911.net](http://raven911.net)

USEPA Flexviewer <https://r5imt2.net/gis/ohio-mapping>

Flier will be send out shortly and asked to return to Dale Farmer

Eventually will have training exercises for all contractors so everyone is on the same page during a spill
